### Programme Overview

The NZ Countryside Experience Programme is designed for groups of students looking to improve their English ability while experiencing the country lifestyle of the Waikato region. Waikato is at the heart of New Zealand's dairy farming culture and has an array of animals and endless fields of green to experience.

With this programme, you can experience rural life in the Waikato by seeing the dairy making process up close and trying your hand at making the products. You can interact with the animal life that inhabit Waikato farms. Also spend some afternoons taking in the scenic views of the rural countryside, whether it's by foot, farm tractor or horseback. Each activity compliments the rural aspect of the Waikato and provides a unique agricultural experience.
